Permit Number:P- 3909 -49-15-U

License Number:L- 787

PERMIT TO ENGAGE IN SURFACE COAL MINING OPERATIONS

Pursuant to **The Alabama Surface Mining Control and Reclamation Act of 1981**, as amended, ALA. Code Section 9-16-70 et. seq. (1975) a permit to engage in Surface Coal Mining Operations in the State of Alabama is hereby granted to:

NEW YELLOW CREEK COAL LLC
442 DUPEY DRIVE
GUIN AL 35563
(NEW YELLOW CREEK MINE)

Such operations are restricted to 19 * acres as defined on the permit map and located in: (See Condition #3)

SE/SE OF SECTION 21, SW/SW OF SECTION 22, NW/NW OF SECTION 27 AND THE NE/NE OF SECTION 28, ALL IN TOWNSHIP 12 SOUTH, RANGE 12 WEST, ALL IN MARION COUNTY, ALABAMA

This permit is subject to suspension or revocation upon violation of any of the following conditions:

1. The permittee shall conduct Surface Coal Mining and Reclamation Operations in accordance with the plans, provisions and schedules in the permit application.
2. The permittee shall conduct operations in a manner to prevent damage or harm to the environment and public health and safety and shall notify ASMC and the public in accordance with ASMC Rule 880-X-8K-.16 of any condition which threatens the environment or public health and safety.

CONDITIONS TO BE PLACED ON PERMIT P-3909-49-15-U

3. Surface coal mining operations are restricted to those areas for which sufficient bond has been posted with ASMC. On the date of issuance of this permit, bond was posted only for increment #1 consisting of 10 acres as defined on the permit map.
4. No mining disturbance is to occur on any part of the permit on which legal "right of entry" has not been obtained. When such rights are "pending" the applicant shall submit acceptable evidence, to the Director, that such rights have been obtained according to ASMC Regulation 880-X-8D-.07.
5. No disturbance is to occur on any properties on which land use comments from legal owners of record are "pending" prior to the applicant providing acceptable comments.
6. No disturbance is to occur in the 300' setback area to any occupied dwelling prior to the applicant providing acceptable evidence to ASMC of its having secured a waiver of each subject area signed by the owner of the dwelling.
7. No mining disturbance shall occur within the 100' setback of any public road or the relocation of any public road prior to the applicant providing acceptable evidence, to the Director, of its having secured approval for a waiver from the appropriate jurisdictional authority and specific written waiver from ASMC.
8. No disturbance is to occur on any area that conforms to the U.S. Army Corps of Engineers (Corps) definition of wetlands until acceptable evidence is submitted, to the Director, of Corps approval.

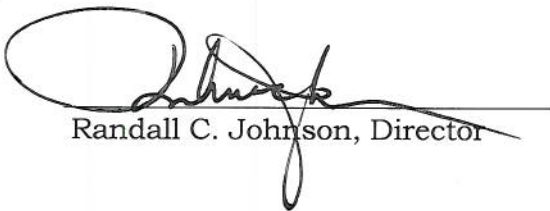

FOR UNDERGROUND MINES

9. This permit in no way authorizes the operator to cause material damage to or otherwise impair any lands, facilities, or improvements located on the surface above or adjacent to the mineral being mined in violation of the property rights of any owner of surface lands or facilities.
10. Any water supply impacted by subsidence or other causes associated with underground mining will be replaced or restored by the permittee.
11. The permittee shall notify the ASMC and seek consultation with the US Fish and Wildlife Service if:
 - a. The permit is modified in any way that causes an effect on species or Critical Habitat listed under the Endangered Species Act of 1973.
 - b. New information reveals the operation may affect Federally protected species or designated Critical Habitat in a manner or extent not previously considered or
 - c. A new species is listed or Critical Habitat is designated under the Endangered Species Act that may be affected by the operation.

12. The permittee shall contact the ASMC and consult with the Alabama Historic Preservation Officer if the permit is modified or if previously unknown archaeological or historic resources are discovered on the permit area. Upon discovery of previously unknown artifacts or archaeological features the permittee shall cease operations until the Alabama Historic Preservation Officer approves resumption of operations.

Randall C. Johnson, Director

FINDINGS

PERMIT NO.: P-3909-49-15-U

The ASMC, acting by and through its Director, hereby finds, on the basis of information set forth in the application or from information otherwise available, that --

1. The permit application is complete and accurate and the applicant has complied with all requirements of the Act and the regulatory program.
2. The applicant has demonstrated that reclamation as required by the Act and the regulatory program can be accomplished under the reclamation plan contained in the permit application.
3. The proposed permit area is:
 - (a) Not within an area under study or administrative proceedings under a petition, filed pursuant to Chapter 880-X-7 to have an area designated as unsuitable for surface coal mining operations;
 - (b) Not within an area designated as unsuitable for mining pursuant to Chapter 880-X-7 or subject to the prohibitions or limitations of Section 880-X-7B-.06 and Section 880-X-7B-.07 of this chapter; or
4. For mining operations where the private mineral estate to be mined has been severed from the private surface estate, the applicant has submitted to the Regulatory Authority the documentation required under Section 880-X-8D.07 and Section 880-X-8G-.07 of this chapter.
5. The Regulatory Authority has made an assessment of the probable cumulative impacts of all anticipated coal mining on the hydrologic balance in the cumulative impact area and has determined that the proposed operation has been designed to prevent material damage to the hydrologic balance outside the permit area.
6. The applicant has demonstrated that any existing structure will comply with Section 880-X-2B-.01, and the applicable performance standards of Chapter 3 or 10.

FINDINGS

PERMIT NO.: P-3909-49-15-U

PAGE #2

7. The applicant has paid all reclamation fees from previous and existing operations as required by 30 C.F.R., Subchapter R.
8. The applicant has satisfied the applicable requirements of Subchapter 880-X-8J.
9. The applicant has, if applicable, satisfied the requirements for approval of a long-term, intensive agricultural, postmining land use, in accordance with the requirements of 880-X-10C-.58(4) and 880-X-10D-.52(4).
10. The operation will not affect the continued existence of endangered or threatened species, or result in destruction or adverse modification of their critical habitats, as determined under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).
11. The Regulatory Authority has taken into account the effect of the proposed permitting action on properties listed or eligible for listing on the National Register of Historic Places. This finding is supported in part by inclusion of appropriate permit conditions or changes in the operation plan protecting historic resources, or a documented decision that the Regulatory Authority has determined that no additional protection measures are necessary.
12. For a proposed remining operation where the applicant intends to reclaim in accordance with the requirements of Section 880-X-10C-.56 or 880-X-10D-.49, the site of the operation is a previously mined area as defined in Section 880-X-2A-.06.
13. Surface coal mining and reclamation operations will not adversely affect a cemetery.
14. After application approval but prior to issue of permit, ASMC reconsidered its approval, based on the compliance review required by Section 880-X-8K-.10(2)(a) in light of any new information submitted under 880-X-8D-.05(8).
15. The applicant has submitted the performance bond or other equivalent guarantee required under Chapter 880-X-9 of the ASMC Rules prior to the issuance of the permit.

FINDINGS

PERMIT NO.: P-3909-49-15-U

PAGE #3

16. For mining operations where a waiver is granted from the 100' setback from a public road according to 880-X-7B-.07, the interests of the public and affected landowners have been protected.

FOR UNDERGROUND MINES:

17. This permit does not constitute a determination that the operator has the legal right to cause material damage to or impair any surface lands or facilities above or adjacent to the mineral being mined, according to the Energy Policy Act of 1992, SMCRA Section 720(a)(1), 30 U.S. Code Section 1309a. In addition, by accepting this permit the applicant agrees that any water supplies impacted by subsidence be replaced according to the Energy Policy Act of 1992, SMCRA Section 720(a)(2) 30 U.S. Code Section 1309a.
18. The Regulatory Authority has taken into account the effect of the proposed permitting action on properties listed or eligible for listing on the National Register of Historic Places. A site survey was not performed on this mine site because the area has been previously disturbed by past mining, logging and road construction. A summary of the project was submitted to the State Historic Preservation Officer who concurred with these findings by letter dated November 27, 2007. This finding is supported in part by inclusion of appropriate permit conditions or changes in the operation plan protecting historic resources, or a documented decision that the Regulatory Authority has determined that no additional protection measures are necessary. Concerns for unknown resources, which might be discovered during mining have been made conditions of the permit.
19. The US Fish and Wildlife Service (FWS) provided comments dated December 3, 2007 on the proposed operation. The FWS found that no federally listed species or critical habitat are known to exist on the proposed permit area. The US Army Corps of Engineers authorized the activities, which would impact waters – 80 linear feet of stream and 0.31 acres of wetlands under Nationwide Permit 21 SAM-2007-02162-HWL dated October 29, 2009. The ADCNR provided comments dated November 9, 2007 indicating the nearest species of concern occurred 9.8 miles from the permit area. Other concerns and recommendations of the ADCNR have been addressed in the permit.

FINDINGS
PERMIT NO.: P-3909-49-15-U
PAGE #4

The ASMC finds that the proposed operation will not jeopardize the continued existence of endangered or threatened species or critical habitat thereof.

20. The proposed permit area is:

- a. Not within an area under study or administrative proceedings under a petition, filed pursuant to Chapter 880-X-7 to have an area designated as unsuitable for surface coal mining operations;
- b. Not within an area designated as unsuitable for mining pursuant to Chapter 880-X-7 or subject to the prohibitions or limitations of Section 880-X-7B-.06 and Section 880-X-7B-.07 of this chapter.

BASED ON THESE FINDINGS, I RECOMMEND THAT THIS PERMIT BE ISSUED.

DATE: APRIL 16, 2010

Mark Woodley, Permit Manager
